

Learning a Transmitter Into Homelink

- 1.) Be sure to learn the Transmitter into the Linear operator
- 2.) Take the transmitter into your car
- 3.) Press and Hold the Homelink Button in the car
- 4.) Press and hold the button on the learned transmitter for 8 to 9 seconds and release only the transmitter button
- 5.) Immediately press transmitter button again and hold for 8 to 9 seconds
- 6.) Repeat Step 5 four or five times (**Be sure to hold the Homelink button the entire time**)
- 7.) Homelink will signal when it has learned the code from the transmitter

Homelink needs approximately 30 to 35 seconds to learn the complex code used in the MegaCode series. Our transmitter stop transmitting after 10 seconds so we must use this method to trick Homelink into thinking it's getting a continuous 30 second transmission.

** Please let the customer know that we do not own Homelink nor do we have any knowledge of how their system works. If the above process does not work, lead them to the Homelink website <http://www.homelink.com/program/watchvideo> for further instructions. **
