Capacity	17 Gallons
Fill Point	OE Factory/Split
Fuel	Petrol
Location	Next to D/S
Relocate Spare	Yes
Exhaust	Relocate Muffler

Tank shown in JL as example

This add-in auxiliary tank kit from Long Range Automotive of Melbourne, Australia was developed to meet the needs of North American owners. The goal? To provide additional fuel capacity from a high-quality aluminized steel replacement tank that integrates seamlessly with factory fuel systems and emission controls in North American vehicles.

The tank **may** be installed by a general automotive shop or mechanically competent vehicle owner, given adequate tools, skills and the help of a friend. **We strongly suggest you consult one of our many dealers for professional installation.**

LR America partner Georg Esterer in the LRA tank tech center in Lilydale, Australia

INSTALLATION NOTES JT Gladiator 17 Gallon Add-In Auxiliary Tank

This kit is in the late development stage. We have one installed vehicle in expedition use at Expedition Overland. A Jeep JL 4 door tank/kit was installed in the Gladiator using supplemental brackets. Our production kit will follow the same method.

The tank is located next to the driveshaft, replacing and relocating the original equipment muffler. In the first installation, the spare tire was replaced with a JT/JL style muffler behind the rear axle as shown below.

Our second development install is scheduled for production in early January.

Please stay tuned for details.

JT Sport scheduled for install January 2020

Expedition Overland JT with LRA tank installed October 2019
