To Whom it May Concern:

Valvoline recommends the use of Valvoline European Vehicle Full Synthetic SAE 5W-40 engine oil for engines calling for Mopar/Chrysler MS-12991 application. Valvoline's European Vehicle Full Synthetic SAE 5W-40 engine oil meets the requirements of today's engines, including turbochargers, gasoline direct injection (GDI) engines, and passenger car diesel engines. Valvoline European Vehicle Full Synthetic engine oils are formulated with full-synthetic premium base oils and specialized additives to meet the rigorous requirements of the Mopar/Chrysler specification.

Valvoline European Vehicle Full Synthetic engine oils have been evaluated in rigorous laboratory and on-highway testing to demonstrate performance in a broad array of engines and conditions. We continue to evaluate our products to ensure we're providing the best solution for our customers. Valvoline stands behind the performance of all our products. In the unlikely event that you or your customer experiences any engine issues while using Valvoline Full Synthetic engine oil please contact Valvoline at 1-800-TEAM-VAL for assistance.

Best Regards,
