

Renewable Diesel Brochure

Marathon-Supplied Shell Branded Direct Dealer:

Renewable Diesel (R99)

RENEWABLE DIESEL:

It's a fully renewable diesel fuel made from chemically processed vegetable oils and animal fats. Renewable diesel is a step up from regular diesel fuel because of its environmental benefits and because it improves engine performance. Let's take a deeper look below.

ENVIRONMENTALLY BENEFICIAL:

Unlike regular diesel, renewable diesel is a fully renewable fuel. When compared with petroleum diesel, it reduces emissions and has a 35–47% lower carbon intensity than petroleum diesel.

ENHANCED PERFORMANCE:

Renewable diesel has a higher cetane number than regular diesel, which enhances engine efficiency while providing an overall better fuel-burning value.

QUALITY YOU CAN TRUST:

No quality is lost when you use renewable diesel fuel. It meets the same specifications and requirements as petroleum diesel, and the two can be blended together without any modification required.
